## SAT/PSAT PREP Materials

by Sharon Smith and Walter Dewar

We are excited about making these materials available to you, and we know that through their use and application in your classrooms, you will see the positive results that so many other school districts who have already implemented this program have seen.

All materials are divided into various sections for your ease in retrieving the information you want. As you navigate through this extensive program, please use your browser's "back" arrow to return to the main menu. That will be the most expedient way to view all the materials available. When you print these documents, choose the option "Print as Image." That choice will provide the best copy for you.

To get started, click on the link below which will take you to the Main Menu.
